*"The key to all blessings is patience."
Varroq Termizi [6]*

Article history:	Abstract:
Received: April 13 th 2021 Accepted: April 26 th 2021 Published: May 31 th 2021	Each period has its own problems and issues that need to be addressed. There are also scientists who at all times have contributed to the solution of these problems, selflessly worked in this direction. This article is about Mamat Eshkulovich Khaydarov, doctor of pedagogical sciences, professor who lives in the spirit of the times and works tirelessly to solve the problems of modern education.

Keywords: Professor Khaydarov Mamat Eshkulovich, scientist, scientific school, pedagogy.

INTRODUCTION

Science adorns the world, science is the basis for the development of society, science loves truth, and where there is science, there is no gossip. The man of knowledge has always been appreciated, because wise people were honored for their services to the development of the Fatherland. The learned sages brought the glory of their homeland to the world, and knowledgeably introduced their homeland to other countries. One of these perfect children of our people is one of the specialists in pedagogy of Uzbekistan, a scientist who created a unique school for the study of pedagogy in Uzbekistan, doctor of pedagogical sciences, professor Khaydarov Mamat Eshkulov.

LITERATURE REVIEW.

M. Khaydarov is a spiritual child of Termez State University, he passed life tests from a young age, when he was full of knowledge and knowledge, when he was a great organizer. Our great ancestor, one of the classical representatives of the philosophy of gnosis, Aziziddin Muhammad Nasafi [7] says: "All stages of tree ripeness are in the seed. Only a tree needs the upbringing and care of a diligent gardener in order for the seed to turn into a tree and become a reality. Such purity and morality, knowledge and enlightenment, the discovery of secrets, the appearance of light - all this is inherent in humanity. All that is needed is wise conversations, education and care so that they are revealed "[8]. The lifestyle and scientific works of M. Khaydarov were studied by scientists S. Tursunov [11], B. Kadyrov [12], N. Rustamova [1, 12], D. Lukmonov [9].

We did not quote this quote for nothing. Because the teacher, Doctor of Pedagogy, Professor M. Khaydarov is one of our intellectuals, who enjoyed the conversation of wise and perfect teachers, received knowledge and education, and became a good person and a brilliant scientist.

RESEARCH METHODOLOGY

The article uses research methods for analyzing documents and literature, observation, interviews, comparisons, questionnaires, forecasting.

ANALYSIS AND RESULTS

The great scientist Abu Isa Imam at-Termezi paid special attention to those who dedicated their knowledge to Allah and their hearts. This is true of a teacher who has always devoted his life and work to science when he explains: "Those who are devoted to knowledge feel that they know less, and those who are ignorant consider themselves wise" [5]. Thanks to science, man strives for greatness and pursues a goal. A well-known teacher-mentor, a teacher who makes a worthy contribution to the development of pedagogical science in the region and the republic, M.

Khaydarov, created a pedagogical school for his students, making a worthy contribution to the development of pedagogical science at Termez State University. M. Khaydarov is a passionate, furious, stubborn, unshakable scientist who is able to prove himself in any situation. He is a source of knowledge, an attentive listener, a demanding mentor who requires students to achieve high results, makes students acquire knowledge. During the period of complete renovation of Termez State University, he worked as a rector and made a worthy contribution to the potential of the university, setting an example of true dedication. He made a significant contribution to the organizational, educational and leadership potential of the university and was awarded a high title. M. Khaydarov is kind to friends, a guide for students, mentor, support, support in any situation, for this all friends respect him very much. If necessary, he is always ready to help everyone. In the lines of M. Khaydarov's life there is such wisdom: "Of the countless beings in eighteen thousand worlds, only man was given such a high status, and all living and inanimate beings around us were subordinate to him, so we must thank Allah with all our bodies and every breath" In his heart, he thinks: "Unique blessings have been bestowed on man, his body, soul and spirit in order to enjoy and achieve perfection in everything that the Merciful Lord, the Creator of the universe speaks about." In M. Khaydarov's heart are included consciousness, intellect, speech, sight, hearing, perception, feeling, understanding, problem, thinking, imagination, contemplation, thinking and others.

As the great scientist Khoja Samandar Termezi explained; "My dear, pay attention to talented people! Do not respect untalented people for the merits of their ancestors!" [10] - the motto of the day, which M. Khaydarov always pays attention to. It should be noted that the scientist will highly appreciate the scientific achievements.

M. Khaydarov is a follower of young scientists, a thinker of his colleagues, an inspirer of his students, always a friend and an ambiguous scientist. In his heart is the wisdom of Khoja Samandar Termezi:

"Dear friend! Strive to become a true person! Talk to good people and enrich your experience with wisdom." The human heart is great and infinite. The highest happiness is hidden in the mind, not in emotions. That is why the highest quality of a person is intelligence. He is not afraid that others will become smarter, more educated and more beautiful than him. He never exalts himself, even if he is superior to others, "- said Rene Descartes, the great mathematician and medical scientist. Such noble people are miracles of nature. Scientists brought glory to the world their homeland, and knowledgeably introduced their homeland to other countries. Phrases such as "If you want to know who is who, live with him" or "Tell me who your friend is, I will tell you who you are." in our language. This is true. I am deeply impressed by the fact that Khaydarov Mamat Eshkulovich embodies such noble qualities as diligence, humanity, patriotism, sincerity and humility, as well as the simplicity of scientists that can be in every simple human.

CONCLUSION

Professor Khaydarov Mamat Eshkulovich for his many years of scientific and pedagogical activity has written scientific, popular science articles and many textbooks on various topical issues of pedagogy. KKhaydarov Mamat Eshkulovich for 40 years of teaching activity in this area, guided by the criteria of an effective "mentor-student" system, applied real pedagogical skills in the educational and methodological direction, set an example in scientific and spiritual life, was enterprising, inquisitive, introduced new pedagogical technologies, tried to apply innovations in practice.

Taking this opportunity, we congratulate KKhaydarov Mamat Eshkulovich on his 60th birthday and express our sincere gratitude to him for many years of selfless work in the field of spirituality and enlightenment, as well as for his great contribution to the upbringing of the younger generation in the spirit of patriotism and independence. And, of course, we wish the keen scientist new successes in scientific activity, good health and great creative victories.

In a word, M. Khaydarov, with his hard work and meaningful life, faithfully served people throughout his life, which he considered the essence of life. His long and patient life has become a real school for educating the youth of our country.
