<b>Article history:</b>	<b>Abstract:</b>
<b>Received:</b> 11 <sup>th</sup> February 2022 <b>Accepted:</b> 14 <sup>th</sup> March 2022 <b>Published:</b> 30 <sup>th</sup> April 2022	The article emphasizes the importance of the role of peace and stability in the organization of social and spiritual and educational work, as well as the importance of living and working with a sense of belonging to every citizen of the country.
<b>Keywords:</b> Spiritual And Educational Work, The Activities Of Leading Personnel, Social And Cultural Life, Patriotism.	

Socio-political, spiritual-enlightenment and trade-economic issues in the system of public administration are at the heart of the large-scale reforms being carried out in Uzbekistan today, which is aimed at ensuring the renewal and formation of the foundations of the third renaissance. That is why President Shavkat Mirziyoyev, based on the principles of peace, stability and humanity in the growing role of Uzbekistan in the world community, prioritizes the life, dreams and aspirations of every person living in our country and the effectiveness of tasks in this regard. From the point of view of the current social policy, the creation of jobs on the ground, the opening of opportunities for the development of entrepreneurship and private property, youth, women, issues of care for the elderly and the disabled, care for the needy are reflected in the adopted state programs. The idea of "Let's live freely and prosperously in the new Uzbekistan", adopted on the occasion of the 30th anniversary of independence, is based on great historical experiences. Also, in accordance with our future plans, Uzbekistan is moving forward from national recovery to national growth.

Resolution of the President of the Republic of Uzbekistan, Supreme Commander-in-Chief of the Armed Forces Shavkat Mirziyoyev "On radical improvement of the system of raising the morale of servicemen of the Armed Forces of the Republic of Uzbekistan" dated August 4, 2018 No PP-3898 According to the concept of increasing the efficiency of "Holy Motherland, its protection is an honorable duty!" the idea was put forward. The Armed Forces also designate every Friday as a "Day of Spiritual Prosperity and Patriotism" to encourage the morale of servicemen. The goal is to faithfully protect the sovereignty, territorial integrity and peace of our people.

Large-scale reforms are being carried out in our country to strengthen peace and stability, ensure human rights, freedoms and interests, comprehensively develop our country and enhance its prestige in the international arena.

Thus, the Action Strategy for the five priority areas of development of the Republic of Uzbekistan for 2017-2021, as well as the state program "Year of Youth Support and Public Health", "Prosperous village", "Prosperous neighborhood", "Every family is an entrepreneur", Based on the essence of the reforms carried out in the framework of such important programs and plans as "Our youth is our future", "Five positive initiatives", the human factor is given priority in the main ideological principles of this decision.

We are convinced that under the leadership of our President, Uzbekistan's policy of developing a democratic state based on the rule of law and a just civil society based on a free market economy is focused on the development of society. The activities of public organizations, political institutions and the media in the implementation of comprehensive reforms aimed at liberalizing public administration, improving the state and society building are in line with today's processes. The state, whose policy is aimed only at the interests of the people, ensuring the peace and stability of the country's citizens, is reflected and implemented in the adopted laws, decrees and resolutions of the President. This, along with the definition of the material and cultural image of society, has a positive impact on the spiritual and enlightenment, moral thinking and worldview, spiritual experiences of the citizens of the country. That is why the relationship between the state and the citizen, the government and the population can be reconciled on the

basis of justice. Under the leadership of the head of our state, our people live in peace, and step by step positive economic changes are taking place in our country. New opportunities are opening up for entrepreneurs, knowledgeable and hardworking people. Step by step, positive economic changes are taking place in our country. New opportunities are opening up for entrepreneurs, knowledgeable and hardworking people. Step by step, positive economic changes are taking place in our country. New opportunities are opening up for entrepreneurs, knowledgeable and hardworking people.

The principle that the people should serve our people, not government agencies, is widely applied. Life itself shows the need to increase the human factor in the judiciary through the achievement of justice, ensuring the confidence of citizens in the future and an objective assessment of the activities of government agencies.

Ensuring the viability and enforcement of adopted laws should be a priority in society. Now there is a need for specialists in the public and non-governmental sectors, as well as in all production, employees who are quick to intervene in economic reforms, personnel who meet the requirements of market relations and modern advanced world technology. Therefore, the transition from general production to production based on advanced technologies, increasing the volume of exports of products and training new-minded employees in today's market conditions is an important task.

The fact that every Thursday in our country has been declared the Day of Crime Prevention on the initiative of the President, as well as the holding of mobile court sessions, the establishment of a system of openness and effective dialogue with the people demonstrate the practical application of democratic principles.

Further deepening and expanding the scope of structural reforms, modernization of the economy, ensuring stable and balanced macroeconomic indicators, investment, development of free economic zones, strengthening the private property sector and further improving the business environment, employment as an important condition for income and living standards The large-scale reforms being carried out by the head of our state to ensure and comprehensively stimulate exports are recognized as an important factor in the development of our country.

Now, members of the Senate and the Legislative Chamber of the Oliy Majlis meet with their constituents in the last ten days of each month to work out legal solutions to the problems of the population. . At the same time, the consistent continuation of a well-thought-out monetary policy is considered to be an important issue in creating new jobs.

Today's world is experiencing an information crisis. For this reason, the acquisition of information in the minds of the population is becoming one of the most pressing issues. Now that the interests, moods and social status of all individuals and social groups have been analyzed, the provision of jobs for the unemployed remains an important issue. The development of the non-governmental sector is one of the most important effective tools. Because the non-governmental sector is considered as a starting point in the formation of civil society. It is in these processes that man manifests himself as a subject of society in solving his social problems. We have to admit that due to our carelessness, indifference and some shortcomings in our work, some young people have been exposed to criminal groups, extremists and alien, destructive ideas.

Huge creative work is being carried out throughout the country. The appearance of our Shahapy villages is becoming more beautiful day by day, affordable housing and infrastructure networks are being built on the basis of exemplary projects for the population. Renewable electricity sources, clean drinking water and natural gas supply are improving. The abundance of shops in the markets, our tables are full. All this is, first of all, due to our independence, as well as the peace and tranquility that prevails in our country. It encourages all of us to be selfless.

Ensuring security, interethnic harmony and religious tolerance in our country has been a priority of our state policy. Representatives of more than 130 nationalities and ethnic groups living in our country have united in 138 national-cultural centers and live in peace as children of a large family under the motto "Uzbekistan is our common home." At the heart of this is a huge humanitarian policy. In accordance with the decree of the President of the Republic of Uzbekistan dated May 19, 2017, the Committee on International Relations and Friendship with Foreign Countries was established under the Cabinet of Ministers. The main goal is to consistently continue the state policy aimed at ensuring interethnic harmony and tolerance in our society.

We must always be vigilant in an age of globalization, global competition, confrontation, and threats such as radicalism, terrorism, extremism, proselytism, and "mass culture." Ideas "Take care of your own home", "Take care of your own child" life itself demands that we further increase our mobilization through. The inviolability of the country's borders providing, strengthening the combat potential of our Armed Forces young man-qour trackswe must be educated in the spirit of true patriotism.

Also, the fact that in the current pandemic period, the state itself is at the center of socio-political and the organization of generous and supportive events by the selfless people of our people as partners in this demonstrates the humanitarian nature of the ongoing reforms in our country.

"Everybody can see how intense the competition is around the world right now," he said. We can respond to this fierce competition only through the widespread introduction of modern science, high technology and innovation.<sup>1</sup>

This means that today we need to direct our children to the system of governance through experience, through the full realization of their material but also spiritual and educational potential.

Now, as a result of large-scale reforms in the Armed Forces, we are always proud to show our servicemen the courage shown by our great ancestors - Shirak, Tomaris, Jaloliddin Manguberdi, Temur Malik, Najmiddin Kubro, Amir Temur, Babur. Today, our Armed Forces have significantly improved in organizational and structural terms. The mobility of the structures, the combat capability, the physical and moral readiness of the military increased. Units and units are equipped with modern weapons and combat equipment. The high combat capability of the Armed Forces is economic, political, It is the most important principle of the unity of the people of Uzbekistan and the education of every citizen in the spirit of patriotism through the development of strategic and military-technical and scientific strength. Thus, due to the large-scale reforms in the military sphere, strict discipline, spiritual and enlightenment thinking is growing. Today's young officers are gradually acquiring the qualities inherent in military leadership. This is also an important factor in the new strategy of Uzbekistan.

In conclusion, it should be noted that each of us must contribute to the large-scale reforms being carried out in our country under the leadership of President Shavkat Mirziyoyev. Because the combination of high civic responsibility with a sense of belonging to society will serve the realization of our great goals and further strengthen the position of our country in the world.
